

MARQUISE[®] MIS

CHANNEL
SYSTEM

FEATURES
AND
BENEFITS

THORACOLUMBAR
FIXATION

AMENDIA.

Our angle is better visibility.

The Marquise® MIS Channel System's patented design stands alone. Unlike any other competitive technology, the Marquise MIS satisfies the conflicting goals of limiting muscle damage while also providing surgeons with adequate working access for complex procedures.

The Marquis MIS features:

- A unique design to avoid continuous pressure on paraspinal muscles
- Reduced muscle ischemia/necrosis/scarring
- Easy sagittal movement through paraspinal muscle planes
- Improved access
- Improved instrument working angles
- Accommodation of multiple instruments simultaneously
- Improved light and visibility while reducing glare
- Enable MIS on more obese patients
- Easy pedicle screw and rod insertion

MARQUISE MIS® CHANNEL SYSTEM

PART NUMBER	HEIGHT
4-101-30	6.5cm
4-101-36	8.0cm
4-101-42	9.5cm
